

00:00:00.000 --> 00:00:00.820

VINAY RATTA

Uh, SHASHVAT.

00:00:01.460 --> 00:00:03.110

VINAY RATTA

Did you have a look on the road map?

00:00:04.270 --> 00:00:10.440

SHASHVAT JOSHI

Uh, yes, I've gone to the road map and it's fine. I'll have some other updates I'll discuss in the meeting with you.

00:00:21.870 --> 00:00:23.930

SHASHVAT JOSHI

I think uh, we can start discussing our progress.

00:01:55.860 --> 00:01:57.220

VINAY RATTA

So I can everyone hear me.

00:02:03.020 --> 00:02:03.570

VINAY RATTA

Hello.

00:02:04.910 --> 00:02:05.900

MUZAMMIL RAZA

Yes, we can hear you.

00:02:06.200 --> 00:02:35.160

VINAY RATTA

Yeah. So SHASHVAT, I was importing a different training data center files into one. So I was wondering if a prototype team can decide on like what attributes we will be needing, because I think there is some data which we I don't think we need like a name of the device which is German foreigner for like all of the training data centers. I don't think we will be needing that. So I was hoping.

00:02:35.870 --> 00:02:47.090

VINAY RATTA

Before I start importing the data into one if like product prototype, team can have a look and decide on what attributes we will be needing to make a lot easier.

00:02:49.170 --> 00:02:53.480

SHASHVAT JOSHI

OK, so uh, me and William will have a meeting with you regarding this and then this.

00:02:52.510 --> 00:02:53.460

VINAY RATTA

Yes. Yeah.

00:02:54.150 --> 00:02:54.410

VINAY RATTA

Yeah.

00:02:55.160 --> 00:02:55.620

VINAY RATTA

OK.

00:02:57.620 --> 00:03:01.720

SHASHVAT JOSHI

Yeah. So the database team, do you want to show a progress?

00:03:03.750 --> 00:03:13.540

LUCY MANN

Yep, so this week I'll just stay on my screen. We we set up the Mongo DB testing environment. So you just put a sample data set in.

00:03:14.100 --> 00:03:18.870

LUCY MANN

Umm, obviously we have no data to work with like our own data at the moment.

00:03:20.210 --> 00:03:38.820

LUCY MANN

That's we, we just have to wait for that. But I'll show you what it all looks like. And after this I'll get in contact with Michael, who's the leader of cyber security so that his team can have a look around and see if the the application is on.

00:03:40.300 --> 00:03:49.000

LUCY MANN

Has the appropriate security needed? I I think you can do two factor authentication with the login, that sort of stuff.

00:03:43.760 --> 00:03:44.030

SHASHVAT JOSHI

Hmm.

00:03:49.280 --> 00:03:54.090

LUCY MANN

Umm, but I'll pass it on to him and see, yes.

00:03:54.750 --> 00:03:58.600

LUCY MANN

If if they approved, but I'll, I'll show you what it looks like. So.

00:03:54.900 --> 00:03:55.390

SHASHVAT JOSHI

I'm.

00:04:01.600 --> 00:04:06.740

SHASHVAT JOSHI

I don't know regarding the daughter, you can ask when I she can help you with that. When the data sets.

00:04:07.660 --> 00:04:23.930

VINAY RATTA

Uh, Lucy, if you like. Just wanna like test. At the moment, I can definitely give. Give you like some

files so you can at least start testing and playing around. And by the time you will, you know, have some idea. I think our data will be prepared as well like.

00:04:24.630 --> 00:04:42.420

VINAY RATTA

After like Easter break or something. But if you wanna play around and like test a few files I I can definitely help you with that after this like by this by Sunday I'll send you some files so you can play around and you know like start progressing a little bit yeah.

00:04:28.290 --> 00:04:28.630

LUCY MANN

Yep.

00:04:33.670 --> 00:04:34.200

LUCY MANN

That's all.

00:04:43.000 --> 00:04:49.080

LUCY MANN

Yeah, that's all good. I mean, at the moment we're just we're just upskilling because yeah, there's not much we can do.

00:04:43.670 --> 00:04:44.490

VINAY RATTA

Yeah, yeah.

00:04:47.550 --> 00:04:48.440

VINAY RATTA

Yeah, yeah.

00:04:49.270 --> 00:04:50.370

VINAY RATTA

Yeah, yeah, that's true.

00:04:49.660 --> 00:05:04.570

LUCY MANN

Umm so we I found Mongo DB University which is like provides all these free online courses and you can get certification from them. So we're just doing upskilling loss whilst we wait.

00:05:05.090 --> 00:05:05.270

VINAY RATTA

Yeah.

00:05:05.890 --> 00:05:10.320

LUCY MANN

So this is this is like the whole this isn't the database itself, this is just the whole.

00:05:11.760 --> 00:05:32.070

LUCY MANN

Management page, so I just yeah, I just put in a A sample data set like this is the database access. So this is our team so far. Now I'll add Michael and and William as well to that and then yeah, so there's this whole security page here. So that would be for Michael to to have a look at.

00:05:32.190 --> 00:05:41.020

LUCY MANN

Umm. And then just with the app or just say like the login process or pretty much you just go database connect.

00:05:41.770 --> 00:05:47.230

LUCY MANN

And then we're using Compass, which is the desktop app. So you just copy this string.

00:05:48.210 --> 00:05:53.590

LUCY MANN

On to the app. Place it in here username, password connect.

00:05:55.070 --> 00:06:00.760

LUCY MANN

And that's that's literally it's so far in the databases. And yeah, this is the sample.

00:06:01.010 --> 00:06:04.230

LUCY MANN

Ohm data set, but yeah obviously like this.

00:06:04.910 --> 00:06:11.200

LUCY MANN

Umm system is new to us also. Yeah, we're just upskilling at the moment and then, you know, once you guys have have got some data for us.

00:06:07.900 --> 00:06:08.430

VINAY RATTA

Yeah.

00:06:11.260 --> 00:06:13.970

VINAY RATTA

Yeah, but that looks really good. That looks really good.

00:06:14.800 --> 00:06:16.820

LUCY MANN

So yeah, that's what we've been working on.

00:06:16.940 --> 00:06:31.940

LUCY MANN

Umm, I just need to do the road map for our project. I just finished off some assignments for another unit, but hoping I'll get the road map for the project this weekend. But yeah, otherwise that's really been our progress so far.

00:06:33.200 --> 00:06:41.090

LUCY MANN

But yeah, if you guys have like any recommendations or like want us to tweak anything, just just let us know. But yeah, the plan from now until.

00:06:42.770 --> 00:06:50.340

LUCY MANN

We have some data to work with is just to pass it on to to the cybersecurity team and yeah, continue to upskill.

00:06:53.300 --> 00:06:56.850

SHASHVAT JOSHI

OK. Yeah, uh, game sales analysis.

00:07:00.140 --> 00:07:01.230

SHASHVAT JOSHI

Any updates from you guys?

00:07:45.890 --> 00:07:46.310

SHASHVAT JOSHI

The.

00:07:51.610 --> 00:07:56.400

SHASHVAT JOSHI

Umm, online and Zillow, you and the game team, right? Do you have any progress for this week?

00:07:57.220 --> 00:07:57.660

SHASHVAT JOSHI

To show.

00:08:04.320 --> 00:08:04.740

ANH LINH LE

Hello.

00:08:05.220 --> 00:08:05.870

SHASHVAT JOSHI

Yeah.

00:08:05.930 --> 00:08:07.030

ANH LINH LE

Anyone here hear me?

00:08:07.300 --> 00:08:07.580

VINAY RATTA

Yeah.

00:08:07.980 --> 00:08:20.780

ANH LINH LE

I'm so I I'm actually. I'm outside right now so I cannot change my screen, but I will tell our progress is we try to focus.

00:08:21.590 --> 00:08:23.470

ANH LINH LE

Analyze new data.

00:08:24.230 --> 00:08:26.910

ANH LINH LE

To show how the connect.

00:08:28.120 --> 00:08:32.750

ANH LINH LE

The relationship between health and physical activity.

00:08:33.850 --> 00:08:34.480

ANH LINH LE

Ah.

00:08:35.220 --> 00:08:44.600

ANH LINH LE

We we will update soon you know channel. So maybe tonight or tomorrow night I will update for us.

00:08:46.770 --> 00:08:49.510

SHASHVAT JOSHI

I, uh, will you guys be able to provide a road map by this week?

00:09:27.480 --> 00:09:35.210

VINAY RATTA

Is there a specific folder for the road map or everyone just posting in their own file like?

00:09:35.090 --> 00:09:39.980

SHASHVAT JOSHI

You have to uploading your specific folder that will be uploaded to the gate repository.

00:09:37.440 --> 00:09:37.640

VINAY RATTA

Yep.

00:09:40.170 --> 00:09:40.370

VINAY RATTA

Yeah.

00:10:01.060 --> 00:10:03.760

VINAY RATTA

Uh, should we are still having a meeting at 4:00, right?

00:10:04.250 --> 00:10:04.900

SHASHVAT JOSHI

Uh, yeah.

00:10:05.300 --> 00:10:10.000

VINAY RATTA

And with LANGNING LANGNING I I think he just left.

00:10:12.890 --> 00:10:18.940

SHASHVAT JOSHI

OK, so the prototype team has started working on this second model and that will be done by this weekend.

00:10:19.780 --> 00:10:32.040

SHASHVAT JOSHI

Or the third model for the third and the 4th model, we will have it by next Friday and regarding the second algorithm with time regression 1, William is gonna provide US update by this weekend. He's having some changes in this algorithm.

00:10:33.040 --> 00:10:45.160

SHASHVAT JOSHI

And regarding the GAM team, hung is still working on the prototype part of the Cam, like how it can be utilized and we're still creating some data sets for it. So that's the progress from these two teams.

00:10:48.030 --> 00:10:48.700

SHASHVAT JOSHI

Yeah.

00:10:50.450 --> 00:10:52.300

SHASHVAT JOSHI

So I was going all of the guys. Uh.

00:10:53.000 --> 00:10:54.970

SHASHVAT JOSHI

Progressing well with the upskilling part.

00:11:00.560 --> 00:11:06.020

VINAY RATTA

I think this weekend we all be working with five point 1 distinction task.

00:11:07.340 --> 00:11:13.050

SHASHVAT JOSHI

Yeah, and can everyone please fill up the experience form provided in the file section?

00:11:13.700 --> 00:11:16.130

SHASHVAT JOSHI

Was that what you needed in the company project update?

00:11:13.790 --> 00:11:14.410

VINAY RATTA

Yes.

00:11:16.710 --> 00:11:16.900

VINAY RATTA

Yep.

00:11:18.180 --> 00:11:27.070

SHASHVAT JOSHI

Yeah. And regarding the Git repository, William and I will provide the links by this weekend and on next Tuesday, so we can upload, start uploading the files on the GitHub.

00:11:31.560 --> 00:11:32.750

SHASHVAT JOSHI

Is everyone alright with that?

00:11:33.150 --> 00:11:33.440

VINAY RATTA

Yep.

00:11:35.670 --> 00:11:38.740

SHASHVAT JOSHI

OK. Yeah, we can stop the meeting right now then.

00:11:39.280 --> 00:11:39.670

VINAY RATTA

OK.
