

00:00:00.000 --> 00:00:03.150

WILLIAM HEBBLEWHITE

Umm, there'll be a much more explicit.

00:00:05.710 --> 00:00:12.500

WILLIAM HEBBLEWHITE

Restructuring that won't work in relation to how?

00:00:14.160 --> 00:00:17.520

WILLIAM HEBBLEWHITE

It currently is where we have sort of people segmented.

00:00:18.140 --> 00:00:24.050

WILLIAM HEBBLEWHITE

Umm, according to the degree or the skills and abilities, it'll be much more project focused.

00:00:26.470 --> 00:00:36.590

WILLIAM HEBBLEWHITE

The data science and sort of team will still exist, but it will exist more as a support network for people in the data science and in data analysis to sort of.

00:00:37.930 --> 00:00:41.800

WILLIAM HEBBLEWHITE

Uh, sort of get help in that more technical area.

00:00:42.710 --> 00:00:43.100

WILLIAM HEBBLEWHITE

No.

00:00:45.580 --> 00:00:48.130

WILLIAM HEBBLEWHITE

And and so that's what I've been working on.

00:00:53.330 --> 00:00:58.120

WILLIAM HEBBLEWHITE

Does anyone want to go next about what they've been working on and how they're Sprint went?

00:01:00.110 --> 00:01:17.720

ANH QUAN HUA

Yeah, sure. I can go next. So I'm from the analytics team and we just finish off our documentation for our first Sprint right now. So we got the documentation on the demo dashboard up and the report for our Fitbit Tracker analysis of.

00:01:18.420 --> 00:01:22.260

ANH QUAN HUA

And and it's been going quite well and.

00:01:23.520 --> 00:01:40.050

ANH QUAN HUA

Not sure about the documentation for the demo dashboard. I think we would have to work on that a little bit more and that will be one of our goals for the next Sprint and we should be starting on next Sprint the from today and I will get the documentation of by probably by the end of weekend.

00:01:41.170 --> 00:01:43.130

ANH QUAN HUA

And yeah, that's probably it.

00:01:43.810 --> 00:01:45.500

ANH QUAN HUA

And our next goal is to.

00:01:46.670 --> 00:01:50.140

ANH QUAN HUA

Properly built up the dashboard and showcase our projects.

00:01:50.970 --> 00:01:52.280

ANH QUAN HUA

And Yep.

00:01:51.000 --> 00:01:51.830

WILLIAM HEBBLEWHITE

Brilliant.

00:01:53.110 --> 00:01:53.940

WILLIAM HEBBLEWHITE

That looks really good.

00:01:53.130 --> 00:01:54.790

ANH QUAN HUA

And I was wondering you, yeah.

00:01:56.800 --> 00:01:57.000

ANH QUAN HUA

Right.

00:01:57.840 --> 00:01:58.370

WILLIAM HEBBLEWHITE

Are you going?

00:01:59.140 --> 00:02:09.280

ANH QUAN HUA

Yeah, I was wondering if there is anything the uh board of Directors or the leaders want us to do before we decide to add another goal for next Sprint.

00:02:10.170 --> 00:02:10.900

ANH QUAN HUA

That's basically it.

00:02:10.260 --> 00:02:15.910

WILLIAM HEBBLEWHITE

Neither there's there's nothing specific. UM, they've got me working on.

00:02:17.160 --> 00:02:25.910

WILLIAM HEBBLEWHITE

A lot of the stuff at the moment is not sort of related to data science and data analysis.

Unfortunately, we're sort of in a in a.

00:02:27.110 --> 00:02:29.700

WILLIAM HEBBLEWHITE

Part of the company that always comes a little bit later.

00:02:31.170 --> 00:02:42.160

WILLIAM HEBBLEWHITE

In terms of assessing that sort of data, what what the company as a whole is working on now is trying to connect IoT with.

00:02:42.990 --> 00:02:43.560

WILLIAM HEBBLEWHITE

Umm.

00:02:46.390 --> 00:02:48.920

WILLIAM HEBBLEWHITE

The we've we've developed an MQ we've we've.

00:02:50.120 --> 00:03:16.930

WILLIAM HEBBLEWHITE

Uh put in place an MQTT server and so and sort of the Mongo DB servers and I'll get Lucy Turd sort of reach out to Asha about how she can be her and her team can be involved in that. But at the moment we're really trying to connect the IoT, the MQTT server run by the web dev team and the MongoDB database. Once that's all connected.

00:03:18.410 --> 00:03:30.580

WILLIAM HEBBLEWHITE

Umm, once that's all connected, then we the data science and data analytics teams will will start getting data that's sort of run through those servers.

00:03:31.050 --> 00:03:36.290

WILLIAM HEBBLEWHITE

Uh, but it's gonna be a little bit of a quiet period for us at the moment.

00:03:36.710 --> 00:03:47.320

WILLIAM HEBBLEWHITE

Uh, so my recommendation would just be to, uh, finish off anything you didn't complete in this Sprint and just you would have seen the message from Rio.

00:03:47.960 --> 00:03:48.630

WILLIAM HEBBLEWHITE

UM.

00:03:50.780 --> 00:04:07.550

WILLIAM HEBBLEWHITE

Uh, maybe if each team can write up a paragraph like 500 words, maybe about what their contribution has been, the whole team and the whole and a couple of screenshots of what like of their contribution. That would be really nice.

00:04:02.270 --> 00:04:02.830

ANH QUAN HUA

Right, right, right.

00:04:07.870 --> 00:04:09.040

ANH QUAN HUA

Yep, for sure.

00:04:11.030 --> 00:04:18.100

WILLIAM HEBBLEWHITE

And just put just upload upload that I'm probably not even 500 words, maybe 300 words and just upload that.

00:04:18.760 --> 00:04:26.210

WILLIAM HEBBLEWHITE

Umm as a DOC file into the data science and analytics theme and I will uh collate all that and send it off to Rio.

00:04:27.590 --> 00:04:30.020

WILLIAM HEBBLEWHITE

But yeah, very quiet over the next week or so.

00:04:30.640 --> 00:04:31.210

ANH QUAN HUA

Right, right, right.

00:04:32.600 --> 00:04:38.040

WILLIAM HEBBLEWHITE

But that sounds really good. Yeah. I really like the idea of of.

00:04:39.000 --> 00:04:42.590

WILLIAM HEBBLEWHITE

The dashboard. One thing I'd like to see.

00:04:44.560 --> 00:04:52.890

WILLIAM HEBBLEWHITE

One thing you could start thinking about and you might wanna reach out to the web design team is.

00:04:53.960 --> 00:04:56.810

WILLIAM HEBBLEWHITE

Thinking about how we can start creating.

00:04:58.120 --> 00:04:59.660

WILLIAM HEBBLEWHITE

Uh user?

00:05:00.730 --> 00:05:03.620

WILLIAM HEBBLEWHITE

Uh unique user dashboards.

00:05:04.570 --> 00:05:05.670

WILLIAM HEBBLEWHITE

Based on sort of.

00:05:06.660 --> 00:05:10.130

WILLIAM HEBBLEWHITE

The dotted that comes in right. Do you understand what I mean by that?

00:05:08.630 --> 00:05:08.870

ANH QUAN HUA

Right.

00:05:10.000 --> 00:05:11.410

ANH QUAN HUA

Yeah. Yeah, yeah, yeah, I get it. Yeah.

00:05:10.960 --> 00:05:22.370

WILLIAM HEBBLEWHITE

Yeah, I may be working with the web dev team or the the web design team. The website design team maybe just create a mock up of what that might look like.

00:05:24.890 --> 00:05:29.490

WILLIAM HEBBLEWHITE

That's. Yeah, yeah. Uh, teams going well. Excellent. Uh, who wants to go next?

00:05:30.090 --> 00:05:41.200

VINAY RATTA

I can go next from the data engineering team. So last week, after discussing with you, we three worked on the data dictionary on the previous.

00:05:33.550 --> 00:05:34.050

WILLIAM HEBBLEWHITE

Great.

00:05:41.270 --> 00:06:12.060

VINAY RATTA

Ohh data and I have just sort of been through the data that you provided from one of the directors and I've already uploaded the data dictionary for that and for the cleaning one the data was pretty good already and I just kind of removed those attributes though the ones having the same values because we are not gonna use that the analysis and I also have uploaded that one as well since the data dictionary.

00:05:52.270 --> 00:05:52.770

WILLIAM HEBBLEWHITE

Uh, brilliant.

00:06:09.610 --> 00:06:09.900

WILLIAM HEBBLEWHITE

Yeah.

00:06:12.140 --> 00:06:29.470

VINAY RATTA

I've been working from the from my team on the document documentation part, but I can like sort of change few things according to the new data now, cause the data given to us was very I think well like very good format.

00:06:17.400 --> 00:06:17.690

WILLIAM HEBBLEWHITE

Yep.

00:06:28.940 --> 00:06:45.550

WILLIAM HEBBLEWHITE

This is the stuff I gave you to this morning. Yeah, I I didn't think. I didn't think it. It have to require too much processing just because it's come. It's come straight from the directors. But it's just good to double check that sort of stuff. I great work in doing that so quickly.

00:06:30.730 --> 00:06:32.490

VINAY RATTA

Yeah, yeah, yeah.

00:06:36.470 --> 00:06:36.710

VINAY RATTA

Yep.

00:06:37.670 --> 00:06:37.910

VINAY RATTA

Yeah.

00:06:38.670 --> 00:06:39.490

VINAY RATTA

Yeah, yeah.

00:06:41.880 --> 00:06:42.110

VINAY RATTA

Yep.

00:06:49.710 --> 00:06:58.140

WILLIAM HEBBLEWHITE

I think that's what you. So one of the things the data engineering could do once again writing that like 300 Word document is.

00:06:56.820 --> 00:06:58.530

VINAY RATTA

Yeah, yeah, yeah.

00:06:59.350 --> 00:07:12.320

WILLIAM HEBBLEWHITE

Document like talking about how you've sort of implemented processes like that like this is what we do. We get the data. This is how we look at it and this is we do all these things. That's great, that sounds really good.

00:07:04.060 --> 00:07:04.270

VINAY RATTA

Yeah.

00:07:08.540 --> 00:07:08.750

VINAY RATTA

Yeah.

00:07:10.640 --> 00:07:11.140

VINAY RATTA

Yeah.

00:07:20.390 --> 00:07:20.820

VINAY RATTA

Yeah.

00:07:20.870 --> 00:07:25.650

WILLIAM HEBBLEWHITE

That contains stuff like heart rate, cadence, speed.

00:07:26.470 --> 00:07:34.930

WILLIAM HEBBLEWHITE

Some of the like variables that we sort of been missing in other data and and and it looks really interesting. We might start thinking about that SHASHVAT.

00:07:36.300 --> 00:07:40.090

WILLIAM HEBBLEWHITE

Cool. Uh. Excellent work. Funny. Great work.

00:07:39.070 --> 00:07:39.790

VINAY RATTA

Thank you.

00:07:41.520 --> 00:07:51.170

WILLIAM HEBBLEWHITE

No, Chris isn't feeling well, so I won't make him talk. Have you uploaded that document yet, Chris? You can just say in chat on that.

00:07:54.500 --> 00:07:56.760

WILLIAM HEBBLEWHITE

Are you still working on the documentation with Jack?

00:07:59.960 --> 00:08:01.530

WILLIAM HEBBLEWHITE

Excellent. Yeah, no worries.

00:08:02.890 --> 00:08:04.420

WILLIAM HEBBLEWHITE

Cool. Uh.

00:08:05.520 --> 00:08:15.810

WILLIAM HEBBLEWHITE

This is this is around the GAM stuff, right? I think SHASHVAT was mentioning it in our meeting this morning that it looked pretty good from what he had seen.

00:08:17.130 --> 00:08:20.500

WILLIAM HEBBLEWHITE

So I'm excited to look into that documentation.

00:08:22.730 --> 00:08:23.360

WILLIAM HEBBLEWHITE

Excellent.

00:08:25.960 --> 00:08:29.850

WILLIAM HEBBLEWHITE

Uhm, Lucy, how's, uh, database stuff going?

00:08:31.280 --> 00:08:34.360

WILLIAM HEBBLEWHITE

You guys were going gun ho at the moment.

00:08:36.110 --> 00:08:39.060

LUCY MANN

Com. Yep. So we've set up.

00:08:40.860 --> 00:08:49.790

LUCY MANN

Restful API. Thank the the MUZAMMIL. He's recorded a video of the setup and how everything works, so I'll put that in the same file.

00:08:50.310 --> 00:08:51.330

WILLIAM HEBBLEWHITE

Pass sweet, yeah.

00:08:51.770 --> 00:08:56.960

LUCY MANN

So yeah, I think it'll be. Also, it'll be something like helpful tool handover.

00:08:57.200 --> 00:09:02.840

LUCY MANN

Umm, I think, yeah, we might be looking at making sort of thought videos or just like screenshot.

00:08:58.390 --> 00:08:58.940

WILLIAM HEBBLEWHITE

Definitely.

00:09:03.630 --> 00:09:07.650

LUCY MANN

You know, and others who have documentation. So I think yeah, that was something.

00:09:08.420 --> 00:09:22.090

LUCY MANN

Lacking lost time at the and you know things, things reveal and images is just so much easier than you are trying to understand. What somebody's written so you know we've achieved our Sprint goal in that sense.

00:09:18.100 --> 00:09:19.510

WILLIAM HEBBLEWHITE

Yeah, yeah.

00:09:22.290 --> 00:09:23.870

LUCY MANN

Umm and.

00:09:24.660 --> 00:09:32.070

LUCY MANN

I had a meeting with AKSHAT, Michael and Mason yesterday afternoon, so we just sort of caught up with one another.

00:09:32.690 --> 00:09:41.670

LUCY MANN

Umm. And we thought it would be a good idea to run a workshop sometime next week if the one stop without paying, obviously going forward.

00:09:43.090 --> 00:09:54.880

LUCY MANN

They'll be working with each other a lot more, I guess. At the moment it's a bit difficult as we're just setting up our initial systems, but you're going forward. That's obviously that integration with the group. So you thought it would be best if I just.

00:09:52.970 --> 00:09:53.250

WILLIAM HEBBLEWHITE

Yeah.

00:09:55.990 --> 00:09:59.380

LUCY MANN

Showcase what we've done and you know how how it all works.

00:09:59.790 --> 00:10:08.990

LUCY MANN

Umm. And yeah, that'll obviously be recorded. And I think there might be a scribe from that. That'll be some great, you know, documentation going forwards as well. So I think.

00:10:09.700 --> 00:10:16.770

LUCY MANN

Umm yeah. Our plan from now till end of the trimester would just be a beginning that that.

00:10:18.080 --> 00:10:20.710

LUCY MANN

Documentation and continue working on.

00:10:21.100 --> 00:10:31.230

LUCY MANN

Umm Reco API, but yeah, those are thought about our goals at the moment, but yeah, we just thought it'd be great to do that one, I guess. Yeah, it's a bit late in the trimester, obviously, but without.

00:10:30.750 --> 00:10:33.350

WILLIAM HEBBLEWHITE

This is great. This is this is fantastic.

00:10:32.410 --> 00:10:33.360

LUCY MANN

With everything going.

00:10:34.700 --> 00:10:39.370

LUCY MANN

Yeah, we just thought we could just do one stuff and then maybe set the tone going forward.

00:10:39.880 --> 00:10:45.690

LUCY MANN

Umm yeah, that's been our our work. And now, yeah. Congress. So up to it.

00:10:46.180 --> 00:10:56.190

WILLIAM HEBBLEWHITE

Ohh correct me if I'm if I'm wrong, but there are. There are two databases in redback operations, right? Webdev create one and you've guys have created 1 right?

00:10:57.110 --> 00:11:04.510

LUCY MANN

Yeah. So we're using the same system at the moment. They're both just testing environments. So obviously, yeah, going forward.

00:11:02.320 --> 00:11:03.490

WILLIAM HEBBLEWHITE

Yeah, that's good.

00:11:05.280 --> 00:11:06.430

LUCY MANN

One will be.

00:11:07.400 --> 00:11:19.560

LUCY MANN

Got it dropped off and we're just we're all work within one, but I guess you had the moment because you're not really working with any company data at the moment. We're just sort of playing around, but yeah, going forward that will definitely be a plan for, yeah.

00:11:19.840 --> 00:11:42.000

WILLIAM HEBBLEWHITE

I think I think, uh, this is what you'll talk, I guess with MQ. We're sorry with AKSHAT and Mason later, but I think it's probably good and I'll talk to them. I'll talk to activate about this. I think it's probably good to maintain both of them, keep one purely as a training environment.

00:11:42.880 --> 00:11:56.870

WILLIAM HEBBLEWHITE

Umm, so we can when when we're sort of onboarding new students who are interested in databases and interested in database manipulations that they can use that as a training thing that doesn't wreck the main database.

00:11:58.580 --> 00:12:07.560

LUCY MANN

Yep, I think that's that's what that's a really good idea, I guess. Yeah. Like when I said drop it, I meant like, well, yeah, I think as in like moved the systems to one.

00:12:09.140 --> 00:12:23.230

LUCY MANN

But yeah, I think in a practice that's upskilling sense, that's a great idea that you don't want new students unfamiliar with the system posting around with the company data and also the hours, anything could happen.

00:12:23.890 --> 00:12:25.820

WILLIAM HEBBLEWHITE

Yeah. Yeah, so I think.

00:12:25.260 --> 00:12:29.470

LUCY MANN

So yeah, I think having that sort of security in the in the practice environment.

00:12:31.020 --> 00:12:35.700

LUCY MANN

But we have a place where you can go play around and learn the work, but I think, yeah, that's probably the best way to upfield.

00:12:36.510 --> 00:12:46.390

LUCY MANN

Anyway, did you have work like learning externally? And then yeah, working in the system. So yeah, maybe, I imagine we'll probably keep ours as sort of a testing environment because I know.

00:12:37.380 --> 00:12:39.150

WILLIAM HEBBLEWHITE

I am getting hands on experience right?

00:12:47.280 --> 00:12:48.330

LUCY MANN

Gotten his pain.

00:12:49.120 --> 00:12:49.910

LUCY MANN

Had set up.

00:12:51.260 --> 00:12:54.130

LUCY MANN

Then set up Restful API with the prior to us.

00:12:53.800 --> 00:12:53.970

WILLIAM HEBBLEWHITE

Yeah.

00:12:54.940 --> 00:12:59.000

LUCY MANN

Umm, cells they we can decide right down the I think that would be the direction we're going.

00:12:59.010 --> 00:13:05.450

WILLIAM HEBBLEWHITE

Yeah. And if we can keep the the two databases as close together in their sort of structure.

00:13:06.290 --> 00:13:14.420

WILLIAM HEBBLEWHITE

Then when we're training new students on the sort of training database, it's just gonna be an easy move over to the main database.

00:13:16.240 --> 00:13:24.970

WILLIAM HEBBLEWHITE

So I think that's a that's that sounds like a good idea and I'm we'll we'll discuss it with Asha. How to how to how we go about that.

00:13:26.660 --> 00:13:29.920

WILLIAM HEBBLEWHITE

Cool. Excellent. Uh and and that?

00:13:30.850 --> 00:13:35.750

WILLIAM HEBBLEWHITE

I guess I'd run through video that MUZAMMIL's working on. That's gonna be.

00:13:36.440 --> 00:13:38.500

WILLIAM HEBBLEWHITE

Brilliant for that training environment.

00:13:40.830 --> 00:13:45.420

WILLIAM HEBBLEWHITE

If we can, if we can. If yeah. Brilliant. Brilliant. A great work.

00:13:46.190 --> 00:13:46.670

WILLIAM HEBBLEWHITE

Uh.

00:13:47.990 --> 00:13:57.160

VINAY RATTA

William, I would like to ask, let's say if we have already like document and everything. So from the next week onwards, would you like to work?

00:13:48.780 --> 00:13:48.960

WILLIAM HEBBLEWHITE

Yep.

00:13:57.240 --> 00:14:03.790

VINAY RATTA

Uh, like, would would you want our team to work with the data visualization team now, like sort of?

00:14:03.180 --> 00:14:09.290

WILLIAM HEBBLEWHITE

I think I think what you wanna do, I think so I'll I'll talk about let's go through sort of the last team.

00:14:10.840 --> 00:14:14.820

WILLIAM HEBBLEWHITE

And then and then we can we talk about the next couple of weeks?

00:14:15.160 --> 00:14:29.470

WILLIAM HEBBLEWHITE

Umm, so uh Shasha. We obviously we had a morning this small meeting this morning discussing the algorithm stuff, but do you wanna give an overview for the rest of the team about what's been going on?

00:14:30.870 --> 00:14:51.460

SHASHVAT JOSHI

I've got. So what? Our team, we have completed our Sprint and we have also finalized all the

documents in the file section. And regarding the individual research that we were doing, William and I myself have finished our work. We just waiting for our final member to publish his documents on the file section and for this work we just waiting for the feedback on the characters.

00:14:51.960 --> 00:14:52.450

SHASHVAT JOSHI

Yeah.

00:14:52.990 --> 00:15:13.070

WILLIAM HEBBLEWHITE

Yeah. So I'll be, I'll give. I'll be. I mean, this meeting is really important because basically I'll be taking all of this stuff to the directors next Tuesday in a meeting and going through all of this. But I'm really impressed with what you guys have achieved over the Sprint. So and yeah, check out each others documentation.

00:15:14.650 --> 00:15:21.500

WILLIAM HEBBLEWHITE

If, if you're, if you're a little bit sort of unsure about how to start presenting, alright.

00:15:23.740 --> 00:15:24.710

WILLIAM HEBBLEWHITE

Now, uh.

00:15:25.440 --> 00:15:27.920

WILLIAM HEBBLEWHITE

Over the next week or two.

00:15:29.260 --> 00:15:29.920

WILLIAM HEBBLEWHITE

Umm.

00:15:31.070 --> 00:15:31.650

WILLIAM HEBBLEWHITE

So.

00:15:32.590 --> 00:15:38.270

WILLIAM HEBBLEWHITE

OK, let's most OK, let me start with this more strictly, I think by.

00:15:38.920 --> 00:15:40.460

WILLIAM HEBBLEWHITE

Hmm. Tuesday.

00:15:42.260 --> 00:15:48.360

WILLIAM HEBBLEWHITE

Afternoon. I'd like a summary of each of your teams.

00:15:49.210 --> 00:15:56.910

WILLIAM HEBBLEWHITE

Umm output this semester and just a couple of like screenshots of what you achieved and I'll pass that on to Rio.

00:15:58.270 --> 00:16:24.360

WILLIAM HEBBLEWHITE

You can put that in a Word document and just uh, send it to me directly through the chat and I'll put it. I'll put it all into a a major document for Rio that's gonna be used in a showcase video for redback operations. So that's the design team and the sort of the recruitment team doing that. So just a short little brief about what your team does and how what it has accomplished this semester and maybe a couple of screenshots if you have them.

00:16:26.110 --> 00:16:26.550

WILLIAM HEBBLEWHITE

Umm.

00:16:28.770 --> 00:16:32.740

WILLIAM HEBBLEWHITE

The sort of as Lucy was sort of mentioning.

00:16:35.940 --> 00:16:37.110

WILLIAM HEBBLEWHITE

Writing up.

00:16:38.570 --> 00:16:44.110

WILLIAM HEBBLEWHITE

Uh documents and on boarding documents. So thinking about how.

00:16:45.490 --> 00:17:05.480

WILLIAM HEBBLEWHITE

Say, say you're going to be a senior person in the company next trimester and whole bunch of new students come in and they're like, what is? What is this team about? So start writing up documents around that and we'll sort of the same like the processes and what you've been looking at.

00:17:08.460 --> 00:17:27.260

WILLIAM HEBBLEWHITE

Uh, so for for Lucy's team. That's gonna be part of, like, MUZAMMIL's video, right? You can show that to new students coming in and they'll know how to what the team is about. You guys don't have to do a video, but sort of that sort of document would be really good. Just maybe a one page 2 page thing.

00:17:28.240 --> 00:17:31.210

WILLIAM HEBBLEWHITE

Umm. Other than that working on?

00:17:33.680 --> 00:17:37.600

WILLIAM HEBBLEWHITE

Working on just fixing up any issues.

00:17:38.260 --> 00:17:55.350

WILLIAM HEBBLEWHITE

And with regard to your own projects, UM, sort of just getting short of making sure everything's in place. And once that's done, so that'll be next week doing trying to do most of that next week after that's done, we're going to start.

00:17:57.130 --> 00:18:06.940

WILLIAM HEBBLEWHITE

Transitioning all of our documentation over to GitHub, which will make it easier for new members coming in to look at that data.

00:18:07.760 --> 00:18:10.280

WILLIAM HEBBLEWHITE

Umm. And you should all start.

00:18:11.160 --> 00:18:12.450

WILLIAM HEBBLEWHITE

Working on.

00:18:13.640 --> 00:18:18.450

WILLIAM HEBBLEWHITE

Your other assessments. Uh, I know there's a lot. There's a lot to still do, but.

00:18:20.110 --> 00:18:33.320

WILLIAM HEBBLEWHITE

Uh, for those aiming for distinction and high distinction, you'll have your, uh, exemplary work and leadership document coming in and for everyone you'll have your learning summary report in about.

00:18:34.530 --> 00:18:37.420

WILLIAM HEBBLEWHITE

In about 3 weeks and your contribution reports.

00:18:38.280 --> 00:18:48.390

WILLIAM HEBBLEWHITE

Are there any questions we're going that right and you know well done to all of those who had had their panel presentation during this week, I hope you all had some good feedback and.

00:18:49.530 --> 00:18:58.640

WILLIAM HEBBLEWHITE

Those are for the those aiming for HD, of course. I hope you had some good feedback from from the subject runners, but yeah, the is there any questions?

00:19:04.930 --> 00:19:05.570

ANH QUAN HUA

Not really.

00:19:06.360 --> 00:19:11.270

WILLIAM HEBBLEWHITE

Awesome. Cool. So we all, we all know what we're supposed to be doing over the next week.

00:19:06.770 --> 00:19:07.060

ANH QUAN HUA

Yep.

00:19:12.880 --> 00:19:13.330

WILLIAM HEBBLEWHITE

Umm.

00:19:14.730 --> 00:19:24.680

WILLIAM HEBBLEWHITE

If you're once again, if you have any questions, just reach out to me. As always, I'm I'm usually. I always try to sort of at least make myself available during the week, but.

00:19:25.340 --> 00:19:25.610

WILLIAM HEBBLEWHITE

Yeah.

00:19:26.870 --> 00:19:28.040

WILLIAM HEBBLEWHITE

If that's it.

00:19:30.340 --> 00:19:37.390

WILLIAM HEBBLEWHITE

I think we can end the meeting there. Thank you, everyone. Once again, great work during the Sprint. Really, really solid.

00:19:39.220 --> 00:19:42.270

WILLIAM HEBBLEWHITE

Hope been going through the documentation and I really enjoy it.

00:19:43.100 --> 00:19:54.350

WILLIAM HEBBLEWHITE

I think that's some really cool stuff there. Uh and now and now our task is to make sure that teams next trimester are able to use that work beneficially.

00:19:55.170 --> 00:19:55.570

WILLIAM HEBBLEWHITE

Umm.

00:19:57.040 --> 00:20:00.610

WILLIAM HEBBLEWHITE

And yeah, I'll see you next week. Have a good weekend.

00:20:01.320 --> 00:20:03.250

ANH QUAN HUA

You too have a good weekend. See you.

00:20:04.070 --> 00:20:04.420

WILLIAM HEBBLEWHITE

Yeah.
